REBEL

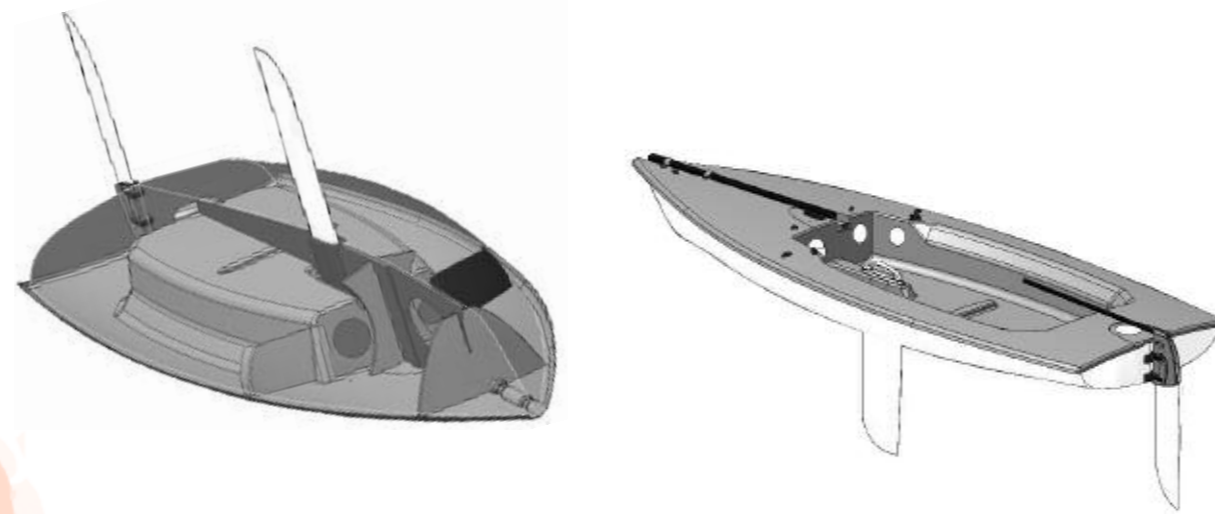

Go over the edge  
and discover  
the **X-factor** of the new  
G-Force Rebel!

# G-Force Rebel.

Sensational fun with the attitude... of a Rebel!

## Rebel : the new trend!

The name G-Force Rebel is not just chosen. This newly introduced dinghy sets in a rebellious way the new trend and goes beyond conventional dinghy concepts. Built with techniques which were never used before in this segment. The hull is made using resin infusion with a strong core of honeycomb and vinylester resin. The process is also used in the aviation industry and results in a hull weighing up to 20% less than polyester or PE boats but with a stronger and stiffer hull. The same process is used for the rudder and centerboard where carbon fibre is also used for additional strength. The result is a strong, fast boat with excellent handling characteristics at high speed. Further the G-Force Rebel has a CE quality certificate and is the South African Boating Award 2006 winner in the category "non-powered trailerable craft".

## The "concept dinghy"

The Rebel is available in 3 models. All dinghies with an enormous "fun factor" with spectacular performance under all circumstances.

Type	Version
"Fun"	Single handed version with mainsail
"Fire"	Single & double handed version with mainsail and jib
"Radical"	Double handed version with mainsail, jib, and genaker

The simple concept of the Rebel allows sailors to grow on the same boat. As base of all three models is the same hull..

The basic model "Fun" has a disc with several colours under the wind indicator. This coloured disc is calibrated with the mainsheet which is having the same colours. So when the wind indicator indicates for example yellow, the young sailor can ease out the sheet or pull the sheet in until the sheet is yellow and the trim is OK. An easy and effective way to learn how to sail. The more experienced sailor can upgrade his "Fun" with a bigger mainsail, a jib and stayed mast to the model "Fire" and when he / she is ready to go for true action the hull allows an easy adjustment of a genaker pole and a total genaker set to model "Radical" which can give the boat a speed of 15 knots at 17 knots true wind.

Go over the edge and discover the X-factor of the new G-Force Rebel!

The Rebel is a dinghy which is designed to perform under all circumstances and is built and designed by the G-Force Yachts principal: Strong, fast and responsive. The G-Force X-Treme 37 for example is the overall winner in the monohull class of the Cape to Bahia Ocean race 2006 and is currently used by the Shosholozu Team, the South African competitors in the America's Cup 2007.

So not just a "new kid on the block" but a serious contender amongst the competition. Not just "another dinghy" but a very well thought out concept, developed by G-Force Yachts in close co-operation with International dinghy sailors.

## Specifications which make the heart beat faster!

Type	Lenght	Weight hull	Sail area (mainsail + jib)	Genaker area
« Fun »	4,32 m	78 kg	4,5 - 6 m <sup>2</sup> (furling)	----
« Fire »	4,32 m	78 kg	8,65m <sup>2</sup> + 2,42 m <sup>2</sup>	----
« Radical »	4,32 m	78 kg	8,65m <sup>2</sup> + 2,42 m <sup>2</sup>	11,10 m <sup>2</sup>

Standard delivered with a set sails supplied by North Sails (dacron for model 'Fun', mylar for the 'Fire' and 'Radical'), mast by Proctor Selden and Ronstan hardware.

## Convince yourself!

The light, strong hull, the perfectly cut sails, the performance and the price-/quality ratio: unique points which makes the G-Force Rebel a serious contender in the market and in the water! Built and tested under extremely heavy circumstances in South African coastal waters and supplied with only the best materials. Quality doesn't lie and whether it is on durability or in many regatta's, the G-Force Rebel shows it's true power and makes this 14 feet dinghy a true winner!

Convince yourself, step on board and be surprised by the ease and simplicity with which the G-Force Rebel will make you speed over the water! The Rebel is ready!!! Are you?!
